Dear Sir,

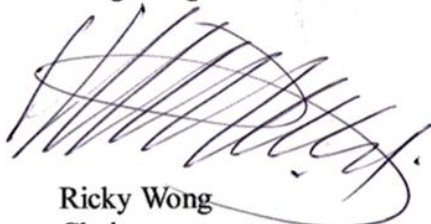

**Subject: After installed GF2000 Green Filter**

Some of our members have been installed your company product (Green Filter). After 23 months has been used. We cannot find any side effect or damage to those engines. There was not any maintenance to the Green Filter. All those vehicles have achieved a significant reduction in exhaust pollution. And they have passed the chassis dynamometer test.

For last ten years, most our members vehicles are running between Hong Kong and Mainland China. For the convenience, they might use low sulphur diesel which from Hong Kong and high sulphur diesel which from China. The mentioned above vehicles have been used both diesel. However on the high or low sulphur diesel, the Green Filter device can improve engine condition and achieved a significant reduction in exhaust pollution.

To become environmental friendly and in view of the current situation regarding the increased awareness and indeed legislation concerning vehicle exhaust emissions, the risk of the roadside checks and Government testing, we would like to recommend our members to use product on their vehicles.

Yours truly,  
For and on behalf of  
Hong Kong Container Tractor Owner Association Ltd.

Ricky Wong  
Chairman
