22nd AUG. 2002

Dear Mr. Wong

Subject: Green Filter on Dumper Truck

We write to confirm that we are still continuing to fit the Green Filter system to our dumper trucks as we have done since its introduction in march, 2001. Some of our members have installed the Green Filter device. Those truck drivers have found the device can improve the engine performance especially to the better exhaust pollution even for the full load status. Those trucks have been passed the annual truck examinations, which have found the very low emissions. our members' responses have proved the device working excellence such as no harmful for those engines, no maintenance, high or low speed and empty or full load.

For our members trucks are servicing a lot of building sites and road maintenance all around Hong Kong. All trucks are always shuttling all over Hong Kong. The lower exhaust emissions are being benefit to most people and Hong Kong.

As the above reasons, we are always caring about the environment issues. Our trucks are well maintained, as you would expect. However, the diesel engine has been identified as a polluter. For practices, the Green Filter can make an immediate difference and long terms benefits for the low air pollution. To support Government actions and improve air quality of Hong Kong. Our association will encourage our members to install such device. It can be make the benefit and better air quality to future of Hong Kong.

Yours Sincerely

Wong Sik Chung
Chairman
Hong Kong Dumper Truck Drivers Association
