Dear Sir,

Subject Green Filter Performance is Satisfactory

Our company coaches have installed the Green Filter since April 2001. After 18 months continuous operation, the device showed no side effect or damage to the engines. There was not any need to maintain the Green Filter. During this period, our company coaches, which had installed the Green Filter, were tested for exhaust pollution by smoke meter, all vehicles passed the tests, the Green Filter has achieved significant reduction in exhaust pollution.

We are committed to operate in an environmental friendly manner. We are actively promoting environmental awareness to our members. We are in full support to the government policy and will recommend our members to use vehicle exhaust emissions reduction devices to improve the air quality of Hong Kong.

Yours sincerely,

Matthew Wong  
Managing Director
